The mobile toolbox
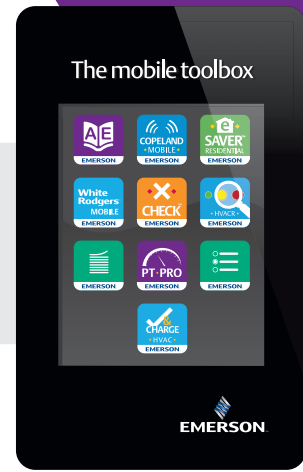

FREE mobile apps, designed to help you service systems more efficiently while on the job.

The mobile toolbox

Copeland™ Mobile

The Copeland Mobile smartphone app provides on-the-go access to the Emerson Online Product Information (OPI) database for Copeland compressor specifications. This database includes both air conditioning and refrigeration products used in a variety of HVACR applications. Available for Android™, Android Tablet, iPhone®, iPad®

AE Bulletins

AE Bulletins is an app that serves as a technical reference for use whenever and wherever you may need it. All documents are optimized for viewing on any smartphone or tablet. You can view documents in PDF format and also share them via email or as a text message. A search function and a drop-down list of bulletin categories have also been provided for your convenience. Available for Android™ or iPhone® devices.

Check & Charge™

Instant mobile refrigerant charge calculator for HVACR applications. To easily calculate correct system refrigerant charge for R-22 or R-410A, simply choose subcooling, superheat, or airflow and enter the specified system temperatures along with the latent and sensible environmental loads. Available for Android™, iPhone®

Emerson e-Saver™

Quickly calculate and show homeowners the annual cost savings of high efficiency systems in the palm of your hand. Available for Android™ or iPhone® devices.

HVACR Fault Finder

Provides on-site compressor troubleshooting for air conditioning and refrigeration applications, allowing contractors to easily access product specifications for Copeland™ compressors containing electronics. Available for Android™ or iPhone® devices.

EMERSON™

WRMobile

Feature-based product selection capabilities provide a quick guide to the right model number for the job. Once found, product brochures, wiring diagrams and installation/operating instructions are available where you need them for thermostats, gas valves, and HVAC controls. Available for Android™, Android Tablet, iPhone® or iPad® devices.

Emerson PTPro

Provides on-the-go access to pressure and temperature conversions. Select a refrigerant and enter a temperature (in C or F) and see what a saturated pressure (in Bar or Psig) will be. You can also enter a pressure and see what the saturated temperature is for that pressure. Available for Android™, iPhone®

Emerson X-Check

Cross-reference database for on-the-go access to Emerson™ valves, controls and system protectors. The X-Check app allows mobile users to pull up information based on manufacturer, product type and model number to locate the corresponding Emerson product. Available for Android™, iPhone®

Vilter Docs

One touch access to Vilter's support documents, in English and Spanish. Available for Android™ or iPhone® devices.

Vilter Select Lite

Allows current Vilter Select web app users to access their projects on-the-go and provide an offline solution to those users who need compressor ratings but do not have an internet connection for periods of time. Available for Android™ or iPhone® devices.
