

Food retail

Success case

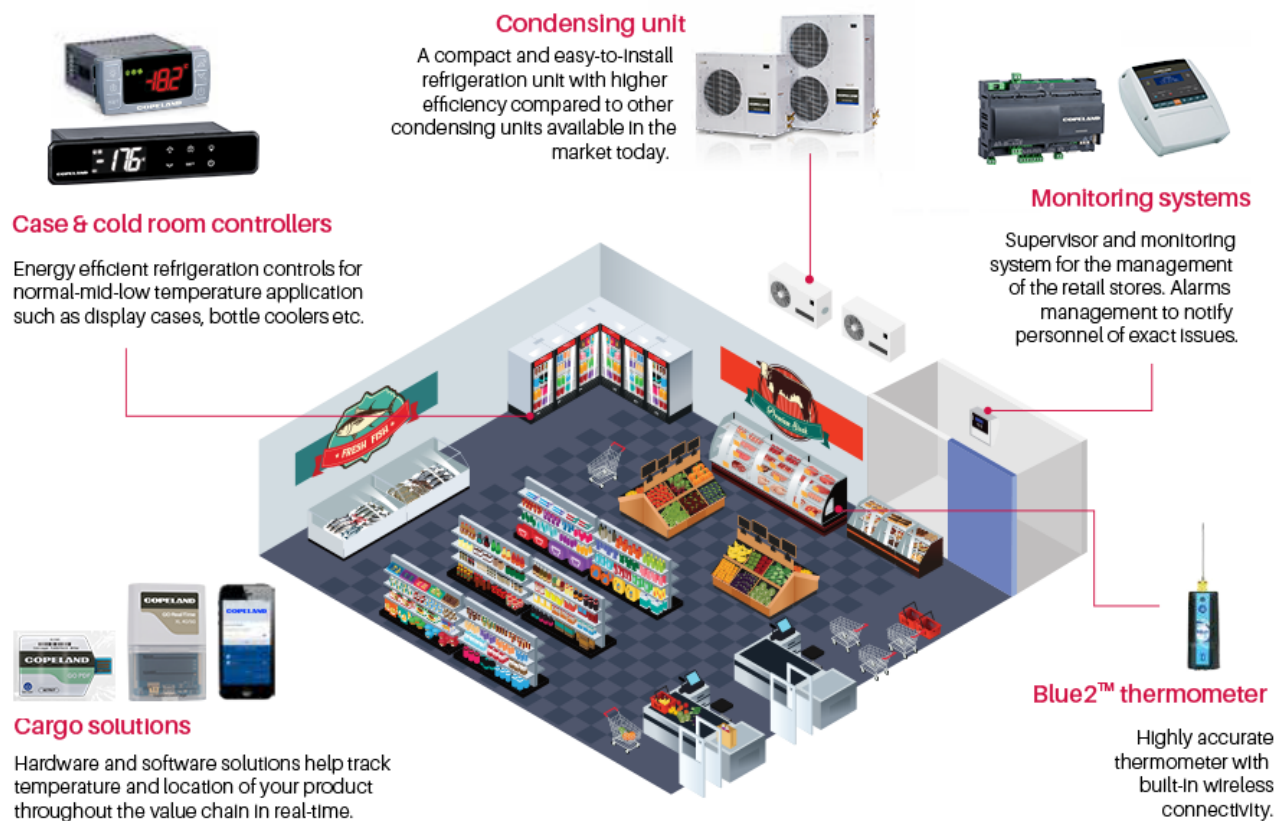

Copeland helped a large supermarket chain in China reduce their energy costs by better managing their facility operations. Each store on average, **saved 24% on their energy bills** as a result of a more efficient and effective control over refrigeration, air-conditioning and lighting.

Challenges

- Refrigerant leaks
- Maintaining shelf life
- High energy consumption
- Minimizing equipment downtime
- Reducing maintenance costs
- Inconsistent store standards

Our Intelligent Store™ solutions help manage disparate refrigeration and HVAC systems to deliver reduced life cycle cost.
