

Button Spinner

Materials:

- (2) Large Button
- String
- CD Disc
- Colorful Sharpies
- Super Glue

Instructions:

1. Decorate the CD
2. Super glue the CD onto the button,
3. thread the string through 2 of the button holes.
4. tie a knot.
5. Holding the string in each hand, twirl your spinner until the string is pretty tight.
6. Stretch the string out and pull to make the button spin.
7. Pull hard stretching and then relaxing the string by moving your hands close together and then apart to keep it going.

The Science:

Twisting the string creates a source of potential energy. As the kids pull apart that potential energy is then converted into kinetic energy.
