

Copeland™ compressors with CoreSense™ technology

Air Conditioning

CoreSense Diagnostics for Copeland Scroll

Copeland Scroll™ with CoreSense Communication

CoreSense Protection for Copeland Scroll

Benefits

Actively protects Copeland Scroll compressors from critical failure

Five system alert codes

Data port for fault history download

Reduces field failures and warranty claims

Onboard Modbus communication

Integrated protection and phase monitoring

Diagnostic fault history over life of compressor

Featured on 24-40 HP Copeland Scroll compressors

Designed to help contractors troubleshoot residential air conditioning systems

Reduces field failures and warranty claims

Applications

Residential air conditioning and heat pumps, single-stage systems

Commercial rooftop air conditioning and chillers

Available in tandem/trio configurations

Residential air conditioning and heat pumps

Superior replacement for single or two pole contactors

Refrigeration

Copeland™ PerformanceAlert

CoreSense Diagnostics for Copeland Scroll K5 compressors

CoreSense Protection for Copeland Discus compressors

CoreSense Diagnostics for Copeland Discus compressors

Actively protects any Copeland compressor

Diagnostics and data monitoring assist with troubleshooting

Onboard Modbus® communication capability

Delivers unmatched energy efficiency resulting in 5-20% improvement

Motor, scroll and bearing redesign minimize annual energy consumption

Redesigned suction gas flow results in lower oil circulation and better motor cooling

Delivers enhanced reliability onboard as standard on every 2D-6D Copeland Discus compressor

Provides oil pressure, motor and discharge temperature protection

Stores fault history information

Communication enables remote reset

Provides protection features found in Copeland Discus with CoreSense Protection

Integrates traditional high/low pressure cut-outs with compressor

Enhanced diagnostics and protection via advanced current sensing algorithms

Communication enables remote reset
