

In-Transit and Cargo Monitoring Solutions

The global perishable supply chain is complex with many handoff points. Our core technologies, coupled with our cold chain expertise, help retailers, restaurants, growers, suppliers, shippers and exporters mitigate food waste while helping ensure only the freshest and safest products reach consumers. Our cold chain solutions provide visibility into in-transit cargo shipments, help enable streamlined supply chains and promote better quality and safety decisions.

Whether you need to monitor and protect the temperature of perishable foods on the road, identify the specific location of a shipment of potentially life-saving medicine, or verify the security of high-value merchandise in transit we have the tracker that fits your business.

The cellular networks that support GO Real-Time Trackers are changing. Many networks across the globe will become obsolete and be replaced by next-generation technologies. This transition may present gaps in coverage and could potentially impair your abilities to track and monitor temperature and location data of in-transit perishable shipments.

With our complete suite of Trackers, we can recommend the correct unit for your geographical region and shipping route.

Tracker Features

- Monitor temperature, location, light and humidity
- Global visibility with real-time alert reporting for loss prevention of high value assets
- Promotes efficient management of cargo throughout the supply chain
- Security detection ideal for tracking door openings and unauthorized cargo access
- Suitable for international ocean or longer, over the road shipments
- Available as multi-use, rechargeable for closed-loop scenarios
- Next generation trackers utilizing emerging low-power, wide area (LPWA) 5G network technologies

GO Real-Time 4G/5G Trackers

GO Real-Time 4G/5G Tracker

GO Real-Time XL 4G/5G Tracker

GO Real-Time Reusable 4G/5G Tracker

GO Real-Time 2G Trackers

GO Real-Time Tracker

GO Real-Time Lux Tracker

GO Real-Time XL Tracker

GO Real-Time CO₂ Tracker

- Monitors temperature, location, light and CO₂ in a rechargeable format
- Ideal for tracking CO₂ product shipment levels in transit
- Access to real-time alert reporting with CO₂ sensor charts

GO Real-Time Flex Tracker

- Monitors location, ambient and pulp temperature, humidity and light
- Dual ambient and probe temperature tracking
- Real-time temperature alert reporting with humidity charts

Product availability may vary by country. Please consult your local sales representative to select the tracker that is ideal for your geographical region and shipping route.

GO Real-Time Trackers are also available in variant containing a non-lithium battery.

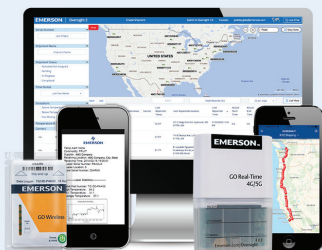

GO Loggers – Data Insight Beyond Your Eyesight

Oversight Software and Services

The central cold chain reporting solution for in-transit shipments.

Comprehensive and automated reporting is provided through the Oversight Dashboard and the Oversight Mobile app. Our technology aggregates encrypted data streams

from GO Real-Time Trackers and Loggers into an online portal enabling cold chain insight into the perishable supply chain. The interface provides robust reporting of key shipment information including temperature, security and location details. Both Oversight and the Oversight Mobile app are available in multiple languages including English, Chinese, Spanish, Italian, German, Portuguese, Turkish, Russian, Korean and French.

From producers and food retailers to shippers and third-party logistics providers, successful companies rely on Oversight Cargo Services to provide the robust cold chain software and value-added services to help them preserve the integrity of their shipments. Take shipment monitoring, data analytics and reporting capabilities to the next level with a suite of modular Oversight Cargo Services. Backed by Emerson's cold chain logistics experts, we work with your teams to provide insights, streamline shipping operations, and strengthen your perishable cold chain.

GO NFC Logger

- Monitors time and temperature data via short-range NFC (Near Field Communications)
- Supports Android and iOS devices with NFC mobile app or NFC Pad Reader
- Data can be stored locally or uploaded and managed via Oversight

GO PDF Logger

- Monitors time and temperature data for perishable and life science products
- Integrated USB connection point for direct computer access
- Automatically generates PDF file, no additional software or readers required

Available in Lite model

GO Contact Logger

- Monitors time and temperature data
- Provides surface read data
- Temperature data accessed via the Contact Reader

GO TH Logger

- Reusable, monitors temperature and humidity levels and is programmable
- LED screen allows for easy reading of current data and alarm conditions
- Data and reporting available with TH Software

GO Bluetooth Plus Logger

- Monitors time, temperature, humidity and pulp temperature
- Two probe options, optimal for a variety of perishable products
- Pairs with Bluetooth reader mobile app for data read range up to 100 feet (30 meters)

GO Systems – Flexibility with Single Solutions

Inbound Monitoring

A self-contained, wireless system that provides a streamlined, automatic temperature monitoring experience. AutoSense™ Gateways are installed in facilities. They are pre-configured and automatically connect when turned on, creating their own independent network. When GO Wireless Loggers arrive on containers, data is wirelessly sent to Oversight for ongoing storage and analysis. Text and email alerts are created and delivered to predefined quality assurance personnel.

GO GreenSense™ Program

GO GreenSense is a recycling program that facilitates the return of GO Tracker and Logger products for proper battery and component recycling. Emerson Cargo Solutions provides customers with eco-friendly return boxes and the appropriate pre-paid postage return labels. Customers can then simply place units in the return box and ship them back to Emerson. GO GreenSense takes the hassle out of returning temperature monitoring devices for recycling.
