San Ramon, California

# ABOUT

## Residence Inn San Ramon San Ramon, California

The Residence Inn San Ramon saved over \$13,600 in energy costs in 2019 following the installation of Verdant's energy management thermostats in 106 guestrooms.

The property uses packaged terminal air conditioners (PTAC) to heat and cool their guestrooms.

Not only is the property generating savings of \$1,137 per month (on average) on its electric bill, it's also able to monitor daily savings through Verdant's cloud-based online management portal.

Verdant's energy management system realized a 29% reduction in HVAC-related guestroom energy costs by setting back temperatures while guests were away from their rooms without compromising guest comfort.

These HVAC runtime reductions have also helped the property increase the longevity of their guest room HVAC units.

\*Utility company rebate covered 100% of system cost.  
\*\*A typical hotel is valued at 13x EBITDA.

## AVERAGE MONTHLY ENERGY SAVINGS

### Residence Inn San Ramon San Ramon, California

Cumulative Savings

**\$13,646**

On average, hotel guestrooms are unoccupied more than 60% of the time, even when rented, wasting energy heating and cooling empty rooms, and unnecessarily inflating electricity costs.

**That's where we come in. Our smart thermostats solve this problem by using advanced occupancy sensing technology to continuously scan the room for motion and body heat.**

When guests are present, they're given full control over room temperature. When guests leave the room, Verdant thermostats enter 'setback mode', allowing room temperatures to drift naturally by a few degrees, reducing HVAC runtimes by 40% on average.

Installing the Verdant energy management system is simple. Property staff can easily install our smart thermostats in less than 10 minutes per room.

The units then start communicating with each other wirelessly, creating a 100% wireless network that can be used by our energy experts to manage your network.

Verdant's proprietary communication protocol leverages low frequency radio waves that easily penetrate thick walls and cover long distances, eliminating the need for additional networking equipment and keeping your WIFI network free of any interference.

Most properties achieve significant annual savings on their utility bills, and a payback period between 12-18 months\*. That's thousands of dollars back in your pocket every year. It's also a significant boost to your property's overall value. That's because every dollar saved in electricity costs increases the resale value of your property by 13X\*\*, generating an incredible return on invested capital. Very few investment opportunities will offer so much upside in such a short time.

And when our own energy experts remotely manage all your thermostats using advanced cloudbased software, you get optimal savings year-round, without any involvement from your staff or discomfort to your guests.

#### Optimal Savings

Optimizes settings in real time, ensuring you get the maximum energy savings possible.

#### Fully Automated

Automates guestroom HVAC energy management at your property, without any involvement from your staff.

#### Self-Installs

Your staff can self-install each thermostat in less than 10 minutes.

#### Compatibility

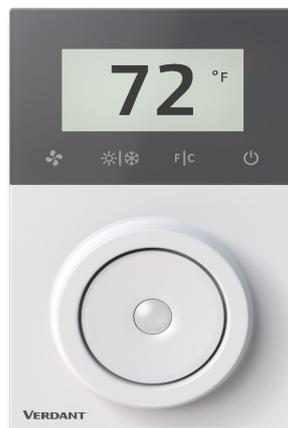

Verdant thermostats are compatible with most PTACS, VTACS, split units and fan coil systems.

#### Complete Coverage

Verdant EI™ includes a complete warranty on all hardware and all software updates.

#### Quick Payback

Cuts room HVAC runtimes by 40% on average\*, and typically pays for itself in 12-18 months\*.
