

AMP (Associated Meat Packers) chooses Copeland for refrigeration applications

Client background

AMP is one of the largest meat wholesalers in Zimbabwe, and aims to deliver quality meat at best prices. Effectively managing a large scale meat distribution operation requires many areas of focus.

The challenge

AMP were looking for the most efficient and cost effective refrigeration units for their new store. The challenge was finding refrigeration systems that tick all the boxes without compromising on quality and standards, from affordability to energy efficiency and environmental consciousness. Of course, space, design and noise levels were also major concerns.

Results summary

Intelligent Store Solutions has allowed the client to manage costs, operations and maintenance needs which has resulted in saving energy, ensuring reliability while saving energy consumption and creating a comfortable quiet environment.

Testimonials

“When we set about the implementation of our project, which was a concept store for our brand, we wanted nothing but the best out there. The Copeland ZXD outdoor condensing units gave us that and more. We got energy saving, ergonomic, space saving technology that was tailored to our store’s design.” AMP Meats

“Copeland’s solutions allowed us to save energy, ensure reliability and create a comfortable quiet environment.”
