

Air-cooled Semi-Hermetic Condensing Units From 1 To 40HP

Designed For Highly Efficient And
Reliable Operation

COPELAND™

EMERSON™

Semi-Hermetic Air-cooled Condensing Units

For many years, users of Copeland™ Semi-Hermetic Condensing Units have relied on Emerson to provide high performance and value to the market. Emerson is committed to continuous technical development while maintaining the traditional values of Copeland™ for refrigeration.

The Semi-Hermetic condensing units are manufactured at the advanced Cold Chain & Distribution Center, Chakan, Pune. With this, release, Emerson offers the widest range of Condensing Units in the Semi-Hermetic technology for commercial and industrial applications. With local manufacturing & stocking, customers will now be able to get units with faster lead times, customized according to their requirements.

They feature excellent quality and are traditionally well known in the refrigeration industry. This product selection

catalogue provides a full listing of the Semi-Hermetic Condensing Unit range for 50Hz operation.

Range:

Three versions are available:

Standard units: Available from 1 to 20HP; economically priced and based on K, L, 2S, 3S and 4S compressors, using reed valve technology. The models come with a large sized condenser, suitable for extreme conditions like high evaporating and/or high ambient temperatures. All units are fit for both medium and low temperature applications.

Copeland Stream™ units: Available from 13-40HP; featuring High Efficiency Discus® valve compressor technology, covering models from 13 to 40 HP. For specific models, they come with a high ambient version featuring a large sized condenser, suitable for extreme conditions. These units are specifically designed for those applications where high efficiency is required.

2-Stage units: Available from 15 to 25HP; for very low temperature applications, units with 2-stage compressors are available.

Standard units

Optional Accessories

The Semi-Hermetic Condensing Unit offers a wide range of different optional accessories:

- Liquid Receiver With Larger Capacity
- Oil Separator
- Canopy
- Unloaded start
- Fan Speed Controller
- Filter Drier
- Capacity Control

Copeland™ Standard Semi-Hermetic Compressors (K, L, 2S & 3S) For 1-20HP

This series is equipped with compressors using reed valve technology which provide 1 to 20 HP motor power. The wide range of models offers solutions for most applications including operation in extreme conditions like high evaporation and high ambient temperatures.

The Salient features of these units are

- Standard equipment
- Multiple choice of refrigerants incl. R404A, R134a and R22
- Robust design with good component accessibility
- Wide range of quality accessories
- Proven reliability

Copeland™ Stream Four And Six Cylinders Compressors (4M,6M) For 13-40HP With Discus Technology

Copeland™ Stream Condensing Units are Emerson's latest innovative development in the Semi-Hermetic segment. This platform responds to advanced system requirements focusing on efficiency, refrigerant flexibility and reliability.

Energy Savings Through Superior Efficiency

With increasing energy costs, system efficiency became the key driver to cut life cycle costs of the installation. Thus energy efficiency is at the forefront of new product design at Emerson.

- The unique Discus™ valve technology improves the efficiency of the Stream compressor
- Generously sized condensers lower the condensing pressure and increase savings

Multiple Refrigerant Approvals Increasing Flexibility For System Design

Refrigerants are usually chosen by application, costs and environmental impact. With more refrigerants in the market it becomes increasingly important that a system can operate as flexibly as possible. Stream units are approved for operation with R404A, R134a, R407A, R407C, R407F and R22. The benefits are:

- One model fits all refrigerants (universality)
- Design flexibility
- Less variation of refrigeration equipment
- Easier logistics & lower stock levels

Maximum Reliability Through CoreSense™ Diagnostics

Besides durable design and the precisely adjusted components CoreSense™ further improves reliability featuring added protection and diagnostics:

- Motor overheat protection
- Oil level protection
- High discharge temperature protection
- Advanced motor protection against single phasing, locked rotor and voltage imbalance
- Alarm history
- LED status display

Standard – R22

India Semi-Hermetic Servicing Center- Reduced Downtime & Peace Of Mind For Emerson Customers

All About The Centre Of Excellence

With global expertise in the field of Semi-Hermetic & Scroll Technology, spanning across 80 years, Emerson has set up best-in-class processes and testing facilities to ensure quality and reliability in compressor servicing.

Emerson's Semi-Hermetic repair center, built on global standards, assists customers with in-depth equipment testing, complete overhaul of electrical and mechanical components and functional testing for the entire range of Semi-Hermetic compressors sold in India.

Assured Of Highest Quality

Emerson Service Centers have extensive product knowledge and provide prompt, professional, guaranteed repair service. Proficient Technical Staff, a global network of R&D and best-in-Industry experience ensure that Emerson always delivers on its commitment of efficient & quality service.

Genuine Spare Parts

Genuine Copeland Parts are engineered for long-term service and maximum performance. To enable fast and efficient service, Emerson maintains an extensive inventory of Original & Genuine Copeland spare parts at the Distribution center, Chakan. Genuine Spare parts details can be accessed at

<http://parts.emersonclimate.eu/IPP1/>

Semi-Hermetic Compressor Servicing: Rigorous Testing To Ensure Reliability

The compressor goes through stringent forms of checks & testing before it is certified fit for use. Emerson is the only manufacturer with a full-fledged test facility for Semi-Hermetic compressors in India. The Service Center is equipped with state-of-the-art testing equipment to ensure best results. These results are then evaluated against Emerson standards to ensure that the compressor passes all the standard qualification criteria for re-use.

1. **Leakage Check:** After reassembly, the compressor is passed through Burst and Dip tank leak test to ensure that there are no leakages.
2. **Vacuum Dehydration:** At this stage the compressor is vacuum dehydrated in a special setup to ensure that there is no air/moisture in it.
3. **Oil Filling:** An advanced "Auto Charge Board", is used to ensure that the right amount of oil is filled according to the model.

Final Test: It is performed with a sophisticated test board with all the data logging features to check for the electrical / oil pump performance, pressure buildup, leakages etc.

Design Services- Customized Refrigeration Solutions For Your Project

Optimally Designed Comprehensive Solutions.

For the refrigeration industry, the equipment selection, project design and construction as well as after-sales services play a crucial role in the implementation of a project. From heat load calculation to equipment selection, Emerson works with you every step of the way providing customized refrigeration solutions that help to ensure your refrigeration project is optimally designed.

Our Design Team -Qualified & Committed To Deliver.

Emerson design engineers bring to the table a world of experience culled from Emerson facilities the world over. They are highly specialized in the area of refrigerated facility design (with each having over 10 years of field experience). They are trained at the highest level in the area of refrigeration systems & design and leverage an experience borne from a global network of R&D. Emerson engineers are truly equipped and committed to provide you efficient & quality solutions for your cooling needs.

Educational Services- Developing Industry Awareness and Instilling Best Practices

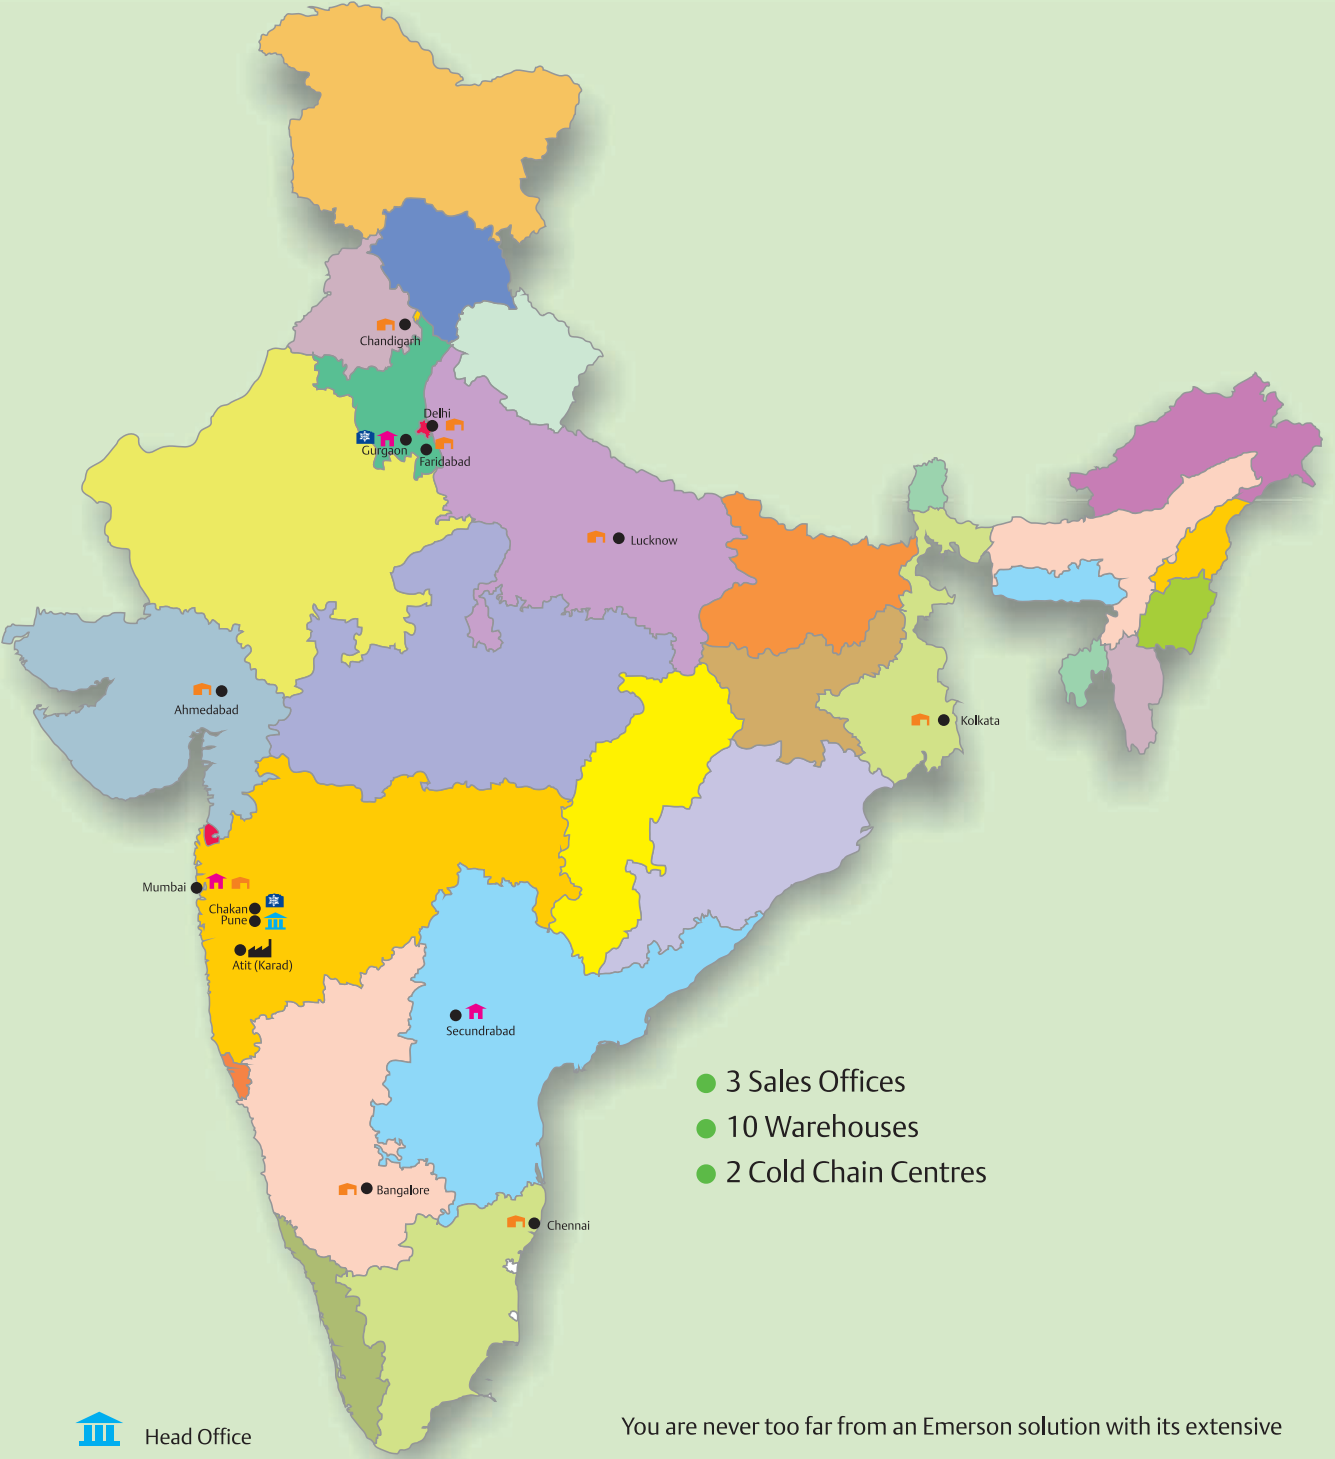

Emerson's Educational Services group delivers comprehensive training programs that not only cover essential service skills, they also keep you up-to-date on emerging technology. Whether it's learning new techniques in refrigeration system maintenance or designing a cold room or implementing a comprehensive energy management program for supermarkets, Emerson gives you the knowledge to succeed.

Emerson Instructors- Recognized Industry Leaders

Every Emerson course is led by an Emerson certified instructor. They are a fine blend of exceptional knowledge and an in-depth understanding of refrigeration principles, technology and the industry as a whole. The instructors have extensive hands-on experience; an innate understanding of the contractor's business needs and concerns, and a proven ability to hold the attention of the participants to provide the best learning experience possible.

Cold Chain Solutions That Span Across The Nation

-  Head Office
-  Sales Office
-  Cold Chain Centre
-  Factory
-  Warehouse

You are never too far from an Emerson solution with its extensive service network, spread across the country. The service engineers are comprehensively trained, committed and well-equipped to deliver quality solutions to meet your cooling needs.

Disclaimer

Technical data given was correct at the time of printing. Updates may occur, and should you need confirmation of a specific value, please contact Emerson stating clearly the information required. Emerson cannot be held responsible for errors in capacities, dimensions, etc., stated herein. Products, specifications and data in this literature are subject to change without notice. The information given herein is based on data and tests which Emerson believes to be reliable and which are in accordance with today's technical knowledge. It is intended for use by persons having the appropriate technical knowledge and skill, at their own discretion and risk. Our products are designed and adapted for fixed locations. For mobile applications, failures may occur.

The suitability for this has to be assured from the plant manufacturer, which may include making appropriate tests.

Note

The components listed in this catalogue are not released for use with caustic, poisonous or flammable substances. Emerson cannot be held responsible for any damage caused by using these substances.
