

Copeland scroll ZX condensing unit

For refrigeration applications.

COPELAND

ZX condensing unit for refrigeration applications.

Copeland offers the ZX platform refrigeration condensing units specifically designed for medium temperature (ZX-MT & ZXB-MT), low temperature (ZXL-LT), digital modulated variable capacity medium temperature and low temperature (ZXD-MT & ZXLD-LT) refrigeration.

ZX series CDU has been highly successful in the Asian market and enjoys proven success with its energy savings and customer-friendly electronic features.

ZX Platform Condensing Unit was designed based on three factors demanded by industry users:

Intelligent store solutions – A most innovative approach to enterprise facility management, Copeland's Intelligent Store architecture integrates hardware and services to provide retailers a single view into their entire network of facilities and understanding what facilities actually cost to operate and maintain. The Intelligent Store architecture transforms data from store equipment and controls into actionable insights. Designed to deliver value in both new and existing stores, Emerson aims to help retailers:

- Make better decisions on resources investment for maximum impact
- Receive accurate feedback and service customized to meet your specific needs
- Reduce operational costs and boost the profitability

Energy efficiency – Utilizing Copeland scroll compressor technology, variable speed fan motor, large capacity condenser coil and advanced control algorithms, energy consumption is significantly reduced. End-users can save more than 20% on annual energy costs compared to using hermetic reciprocating units.

Reliability – Combining the proven reliability of Copeland scroll compressors with advanced electronics controller and diagnostics, equipment reliability is greatly enhanced. Fault code alerts and fault code retrieval capabilities provide information to help improve speed and accuracy of system diagnostics. Integrated electronics provide protection against over-current, overheating, incorrect phase rotation, compressor cycling, high pressure resets and low pressure cut-outs. It can also send out a warning message to the operator when there is liquid floodback, which can prevent critical damage to the unit.

Intelligent store	→	Better decision-making
Highest efficiency	→	Lower energy bills
Reliability	→	Lower maintenance cost

ZX Condensing Unit

Figure 1. ZX Platform CDU features

Features	Owner/Enterprise Benefits
Intelligent store solution	<ul style="list-style-type: none"> • Retail store monitoring • Enhanced energy savings • High-end food safety through real time monitoring
Energy saving	<ul style="list-style-type: none"> • Lower operating costs
Diagnostic protection capabilities	<ul style="list-style-type: none"> • Greatly reduces the chance of nuisance service calls • Extends the life of your equipment • Reduces potential service costs • Keeps equipment operating at their original performance levels to ensure optimum energy efficiency and temperature control • Serves as a guide to what the contractor needs to fix in case of malfunction
Slim profile, lighter weight and optional wall mount capability	<ul style="list-style-type: none"> • Lower installation costs • Enhances the appearance of your enterprise site • Avoids more costly solutions arising from potential location issues
Sound improvement	<ul style="list-style-type: none"> • Creates a more comfortable environment for guests • Beneficial for regions with noise ordinances

Copeland Controller for ZX platform condensing unit

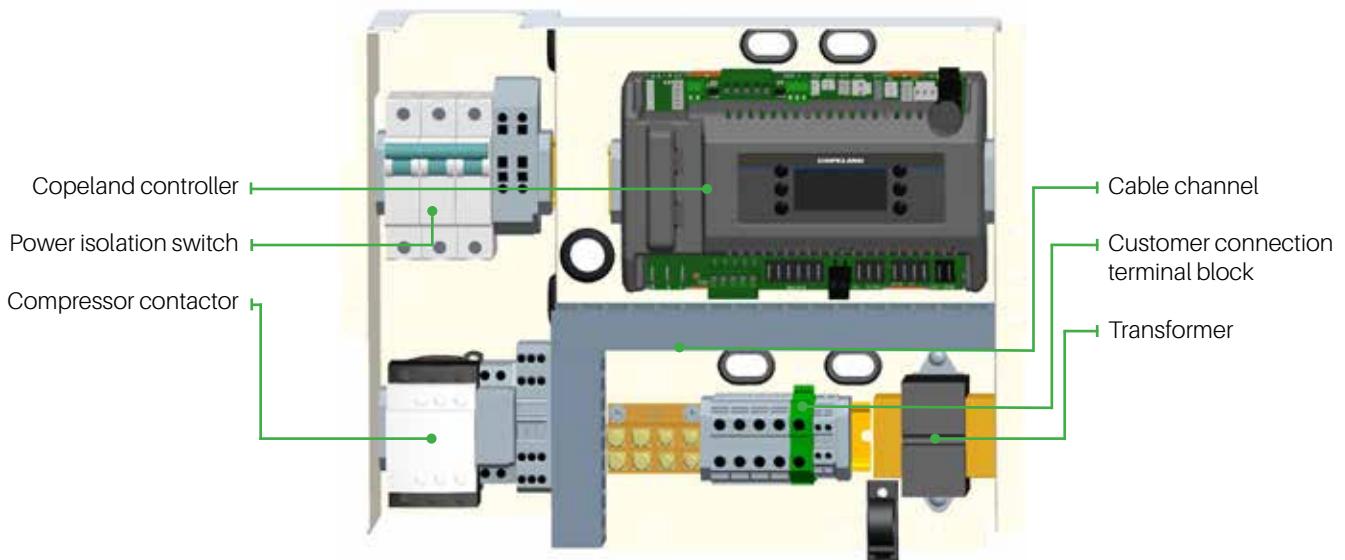

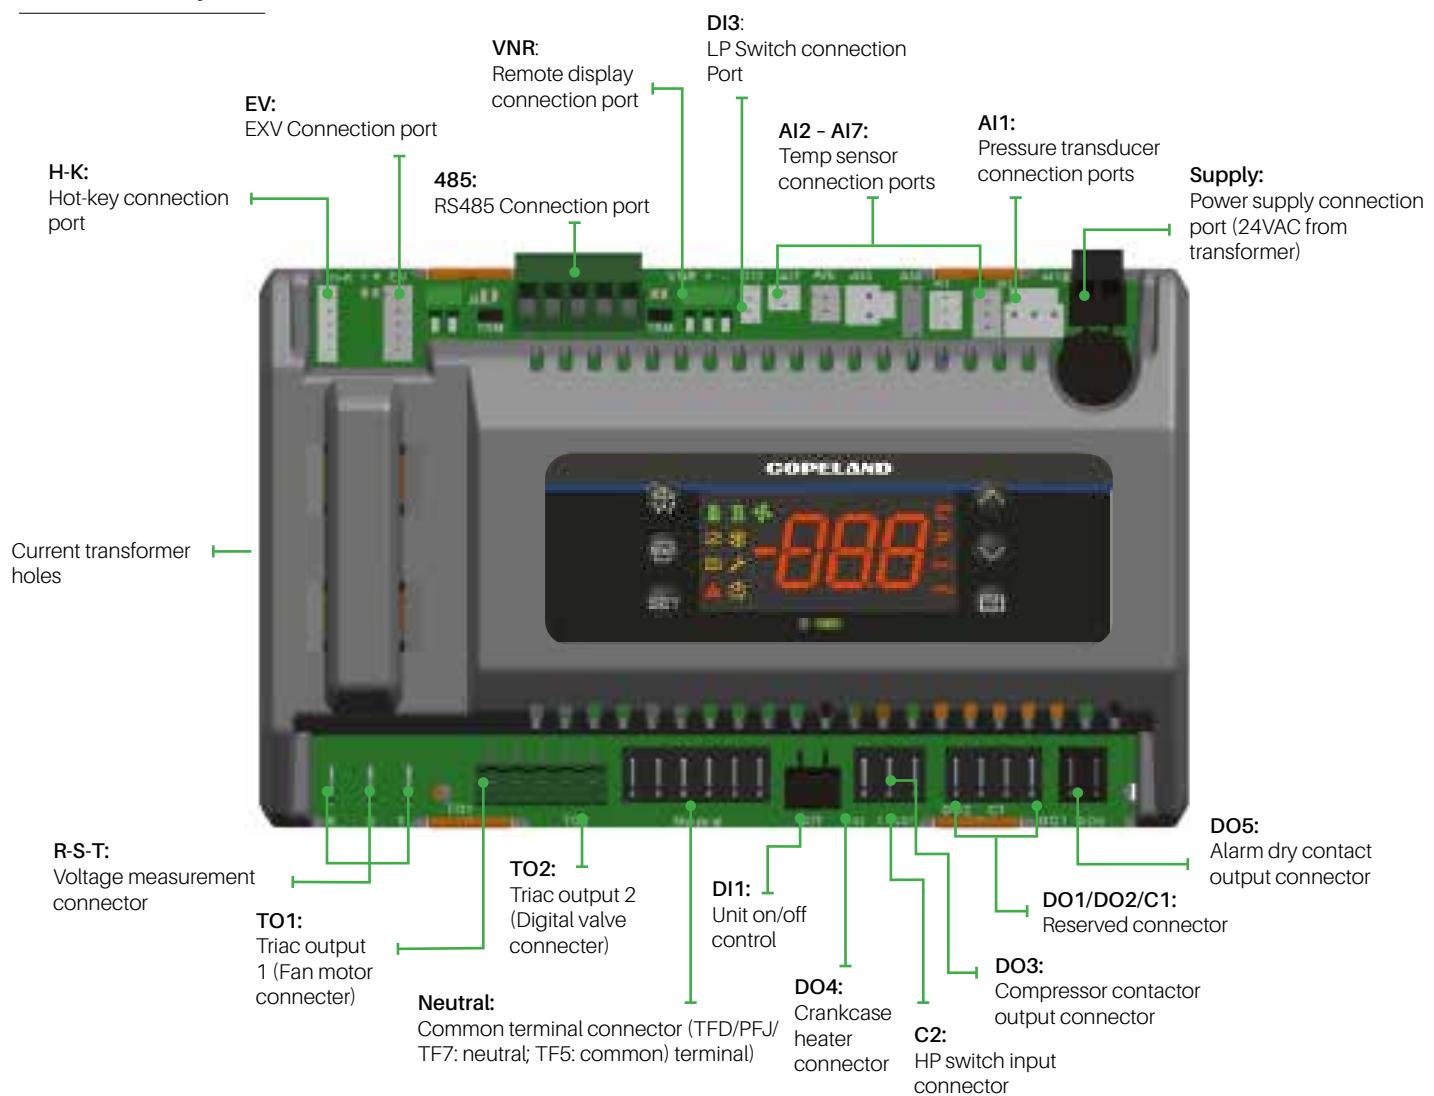

Figure 2. Layout of the control box

Controller layout

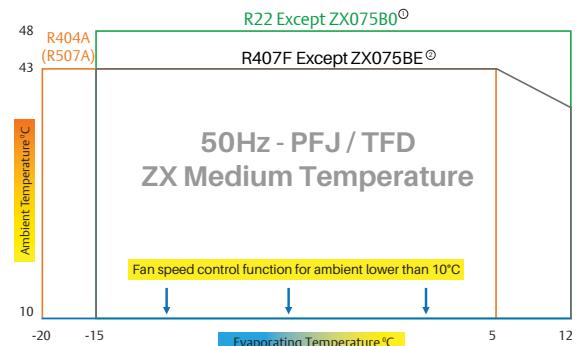

Operating envelopes

ZX Family: Medium temperature

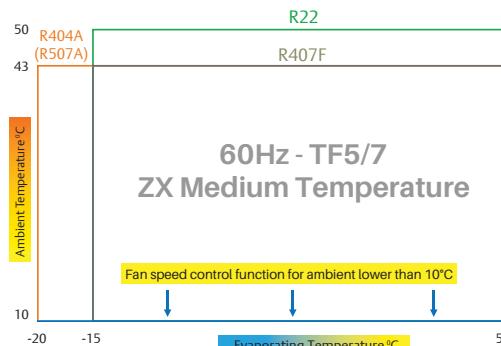

ZX Medium Temperature at 50 Hz - PFJ / TFD

Refrigerant – R404A (R507A), R22, R407F
Maximum Suction Gas Temperature: 20°C

ZX Medium Temperature at 60 Hz - PFV/TF5/TF7

Refrigerant – R404A (R507A), R22, R407F
Maximum Suction Gas Temperature: 20°C

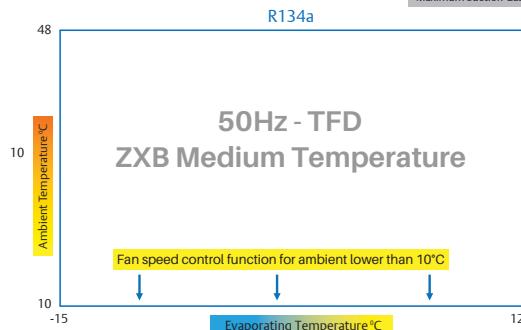

Note: For model ZX075B0 (R22) Max Amb: 43°C, Max Evap: 5°C
Note: For model ZX075BE (R407F) Max Amb: 43°C, Max Evap: 5°C

ZXB Family: Medium temperature

ZXB Medium Temperature at 50 Hz - TFD

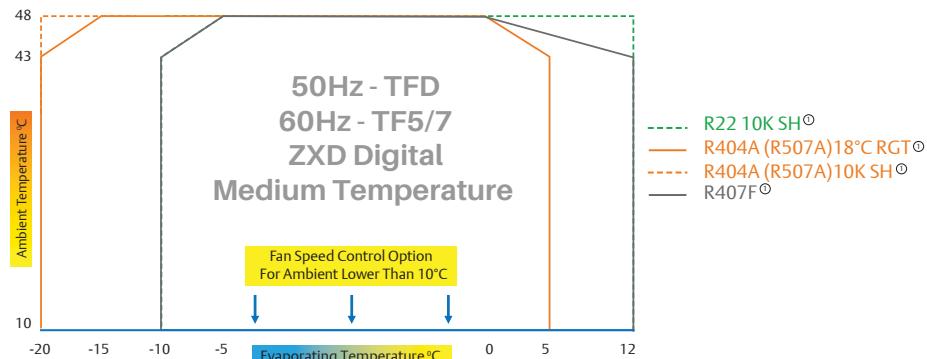

Refrigerant – R134a
Maximum Suction Gas Temperature: 20 °C

ZXD Family: Digital medium temperature

ZXD Digital Medium Temperature at 50 Hz - TFD
at 60 Hz - TF5/7

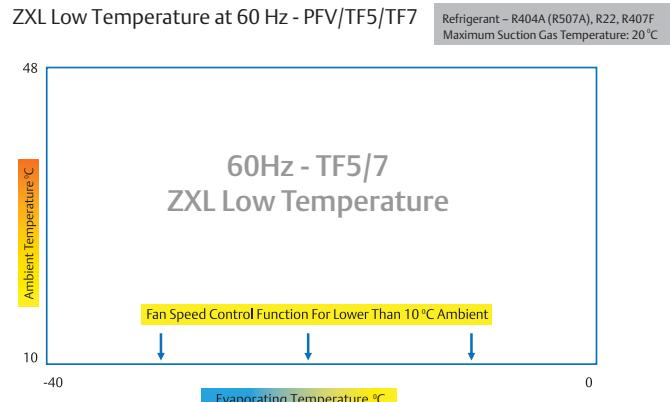

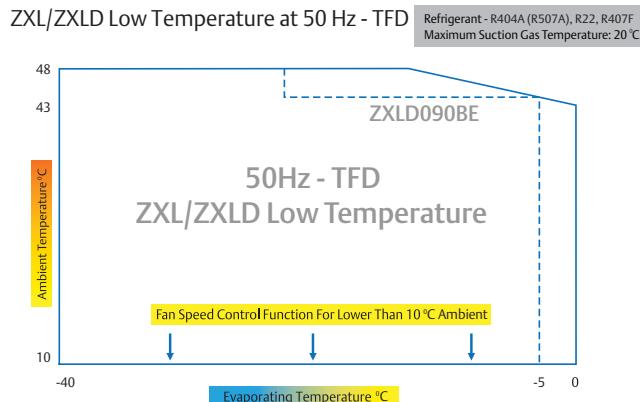

Refrigerant – R404A (R507A), R22, R407F
Maximum Suction Gas Temperature: 20°C
(R22 50Hz-TFD is with 10K SH)

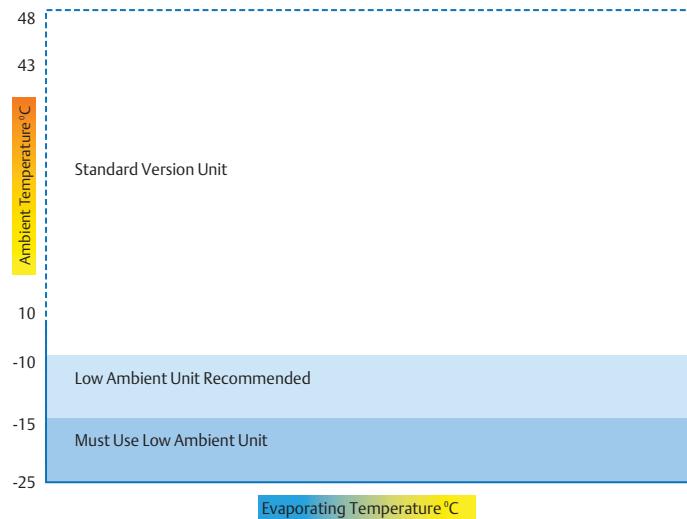

Note: For model ZXD075B0/E Max Amb: 43°C, Max Evap: 5°C

Operating envelopes

ZXL/ZXLD Family: Low temperature

Guideline for using low ambient units

Note: For applications under -25°C ambient temperature, please contact Application Engineering.

Notes: ¹Available on TF7 models only.

The rating condition is based on return gas temperature of 18.3°C.

The rating condition is based on suction superheat of 10 K.

Power includes condenser fan.

Ambient 38°C and 43°C are typical design conditions for unit selection.

Notes: ¹Available on TF7 models only.

The rating condition is based on suction superheat of 10K

ZXD030BE and ZXD100HE rating condition is based on return gas temperature of 18.3°C.

Power includes condenser fan.

Ambient 38°C and 43°C are typical design conditions for unit selection.

Notes: ¹ Available on TF5/TF7 models only

The rating condition is based on the return gas temperature of 5°C.

Power includes condenser fan.

Ambient 38°C and 43°C are typical design conditions for unit selection.

Capacity and power (kW) at 50 Hz - PFJ/TFD

Model	Ambient temperature (°C)	Capacity evaporating temperature (°C)										Power evaporating temperature (°C)

About Copeland

Copeland, a global provider of sustainable climate solutions, combines category-leading brands in compression, controls, software and monitoring for heating, cooling and refrigeration. With best-in-class engineering and design and the broadest portfolio of modulated solutions, we're not just setting the standard for compressor leadership; we're pioneering its evolution. Combining our technology with our smart energy management solutions, we can regulate, track and optimize conditions to help protect temperature-sensitive goods over land and sea, while delivering comfort in any space. Through energy-efficient products, regulation-ready solutions and expertise, we're revolutionizing the next generation of climate technology for the better. For more information, visit copeland.com.

COPELAND

Copeland scroll ZX condensing unit

For refrigeration applications.

COPELAND

ZX condensing unit for refrigeration applications.

Copeland offers the ZX platform refrigeration condensing units specifically designed for medium temperature (ZX-MT & ZXB-MT), low temperature (ZXL-LT), digital modulated variable capacity medium temperature and low temperature (ZXD-MT & ZXLD-LT) refrigeration.

ZX series CDU has been highly successful in the Asian market and enjoys proven success with its energy savings and customer-friendly electronic features.

ZX Platform Condensing Unit was designed based on three factors demanded by industry users:

Intelligent store solutions – A most innovative approach to enterprise facility management, Copeland's Intelligent Store architecture integrates hardware and services to provide retailers a single view into their entire network of facilities and understanding what facilities actually cost to operate and maintain. The Intelligent Store architecture transforms data from store equipment and controls into actionable insights. Designed to deliver value in both new and existing stores, Emerson aims to help retailers:

- Make better decisions on resources investment for maximum impact
- Receive accurate feedback and service customized to meet your specific needs
- Reduce operational costs and boost the profitability

Energy efficiency – Utilizing Copeland scroll compressor technology, variable speed fan motor, large capacity condenser coil and advanced control algorithms, energy consumption is significantly reduced. End-users can save more than 20% on annual energy costs compared to using hermetic reciprocating units.

Reliability – Combining the proven reliability of Copeland scroll compressors with advanced electronics controller and diagnostics, equipment reliability is greatly enhanced. Fault code alerts and fault code retrieval capabilities provide information to help improve speed and accuracy of system diagnostics. Integrated electronics provide protection against over-current, overheating, incorrect phase rotation, compressor cycling, high pressure resets and low pressure cut-outs. It can also send out a warning message to the operator when there is liquid floodback, which can prevent critical damage to the unit.

Intelligent store	→	Better decision-making
Highest efficiency	→	Lower energy bills
Reliability	→	Lower maintenance cost

ZX Condensing Unit

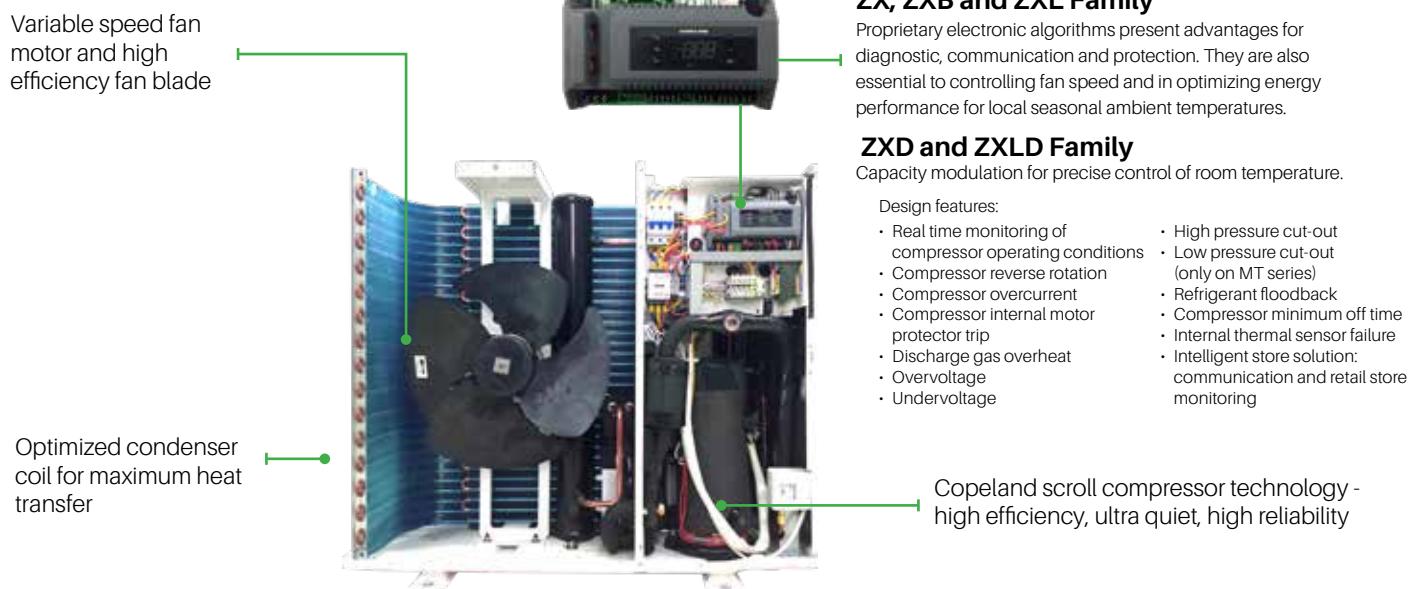

Figure 1. ZX Platform CDU features

Features	Owner/Enterprise Benefits
Intelligent store solution	<ul style="list-style-type: none"> • Retail store monitoring • Enhanced energy savings • High-end food safety through real time monitoring
Energy saving	<ul style="list-style-type: none"> • Lower operating costs
Diagnostic protection capabilities	<ul style="list-style-type: none"> • Greatly reduces the chance of nuisance service calls • Extends the life of your equipment • Reduces potential service costs • Keeps equipment operating at their original performance levels to ensure optimum energy efficiency and temperature control • Serves as a guide to what the contractor needs to fix in case of malfunction
Slim profile, lighter weight and optional wall mount capability	<ul style="list-style-type: none"> • Lower installation costs • Enhances the appearance of your enterprise site • Avoids more costly solutions arising from potential location issues
Sound improvement	<ul style="list-style-type: none"> • Creates a more comfortable environment for guests • Beneficial for regions with noise ordinances

Operating envelopes

ZX Family: Medium temperature

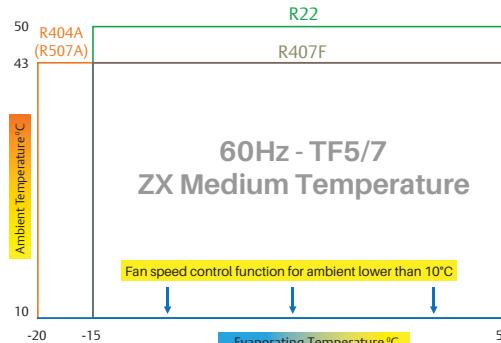

ZX Medium Temperature at 50 Hz - PFJ / TFD

Refrigerant – R404A (R507A), R22, R407F
Maximum Suction Gas Temperature: 20°C

ZX Medium Temperature at 60 Hz - PFV/TF5/TF7

Refrigerant – R404A (R507A), R22, R407F
Maximum Suction Gas Temperature: 20°C

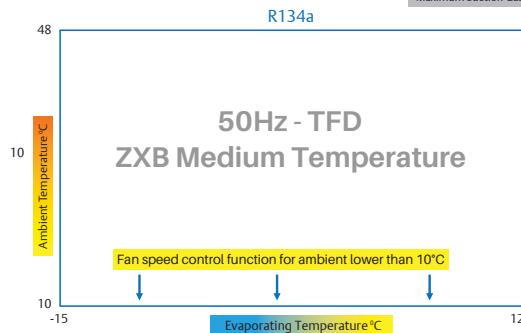

Note: For model ZX075B0 (R22) Max Amb: 43°C, Max Evap: 5°C
Note: For model ZX075BE (R407F) Max Amb: 43°C, Max Evap: 5°C

ZXB Family: Medium temperature

ZXB Medium Temperature at 50 Hz - TFD

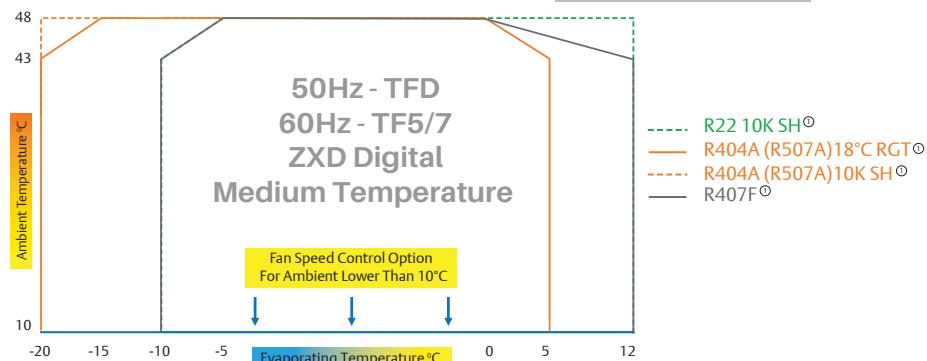

Refrigerant – R134a
Maximum Suction Gas Temperature: 20 °C

ZXD Family: Digital medium temperature

ZXD Digital Medium Temperature at 50 Hz - TFD
at 60 Hz - TF5/7

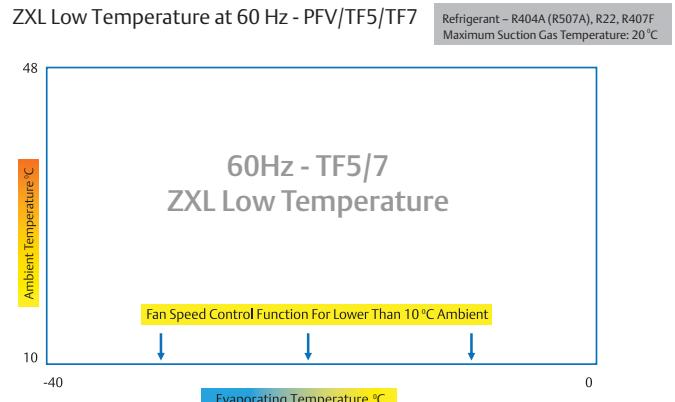

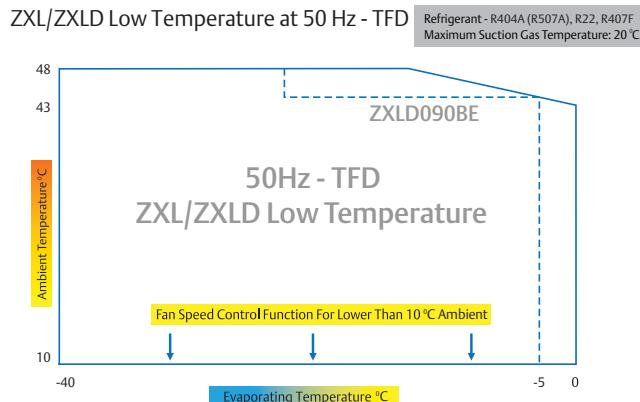

Refrigerant – R404A (R507A), R22, R407F
Maximum Suction Gas Temperature: 20°C
(R22 50Hz-TFD is with 10K SH)

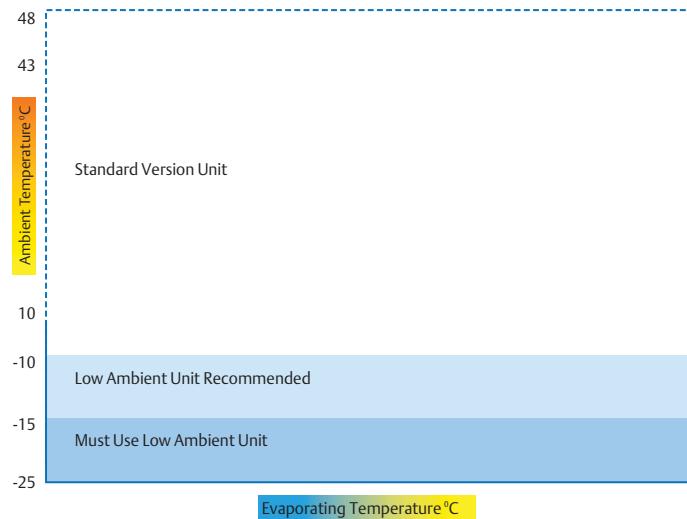

Note: For model ZXD075B0/E Max Amb: 43°C, Max Evap: 5°C

Operating envelopes

ZXL/ZXLD Family: Low temperature

Guideline for using low ambient units

Note: For applications under -25°C ambient temperature, please contact Application Engineering.

Notes: ¹Available on TF5/TF7 models only

The rating condition is based on a return gas temperature of 18.3°C.

Power includes condenser fan.

Ambient 38°C and 43°C are typical design conditions for unit selection.

Notes: ¹Available on TF7 models only.

The rating condition is based on return gas temperature of 18.3°C.

The rating condition is based on suction superheat of 10 K.

Power includes condenser fan.

Ambient 38°C and 43°C are typical design conditions for unit selection.

Notes: ¹Available on TFD models only

The rating condition is based on the return gas temperature of 5°C.

Power includes condenser fan.

Ambient 38°C and 43°C are typical design conditions for unit selection.

Notes: ¹Available on TF5/TF7 models only

The rating condition is based on a return gas temperature of 5°C.

Power includes condenser fan.

Ambient 38°C and 43°C are typical design conditions for unit selection.

Conversion chart

Units conversion chart
KCALH x 3.9683 = BTUH
WATTS x 3.413 = BTU/H
1.80 x °C + 32 = °F
KILOGRAMS x 2.205 = POUNDS
MILLIMETERS x 0.0394 = INCHES
CUBIC CENTIMETERS x 0.06102 = CUBIC INCHES
CUBIC METERS x 35.3147 = CUBIC FEET
LITERS x 33.8181 = FLUID OUNCES
KILOWATTS x 1.341 = HORSEPOWER
BAR x 14.7 = PSI

About Copeland

Copeland, a global provider of sustainable climate solutions, combines category-leading brands in compression, controls, software and monitoring for heating, cooling and refrigeration. With best-in-class engineering and design and the broadest portfolio of modulated solutions, we're not just setting the standard for compressor leadership; we're pioneering its evolution. Combining our technology with our smart energy management solutions, we can regulate, track and optimize conditions to help protect temperature-sensitive goods over land and sea, while delivering comfort in any space. Through energy-efficient products, regulation-ready solutions and expertise, we're revolutionizing the next generation of climate technology for the better. For more information, visit copeland.com.
